JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 223 (1987)

SUBJECT INDEX

Bimetallic catalysts,
preparation and characterization of carbon-based fuel-cell electrodes with platinum-group ——— (Ramesh et al.) 91

Cadmium,
adsorption of fulvic-like organic ligands and their ——— and Pb complexes at a mercury electrode (Buffle et al.) 235
Carbon-based fuel-cell electrodes,
preparation and characterization of ——— with platinum-group bimetallic catalysts (Ramesh et al.) 91
Carbon materials,
redox reactions of quinones on ——— (Tarasevich et al.) 161
Composite dc wave,
determination of the individual electrochemical parameters from a single ——— by the Gauss–Newton method; dc wave composed of three waves (Boodts et al.) 79
Crystallographic orientation,
dependence of the kinetics of proton reduction at gold electrodes on the surface ——— (Hamelin, Weaver) 171
Cytochrome c_3,
the mechanism of the electron-transfer reactions of ——— from *Desulfovibrio desulfuricans* Norway at a mercury electrode (Bianco, Haladjian) 201

Desulfovibrio desulfuricans Norway,
the mechanism of the electron-transfer reactions of cytochrome c_3 from ——— at a mercury electrode (Bianco, Haladjian) 201
6,8-Dioxypurine,
electrochemical oxidation of ——— (Rostami, Dryhurst) 143
Donnan Exclusion Failure,
——— in low anion site density membranes containing valinomycin (Buck et al.) 51

Double layer,
comparison and discussion of some theories of the equilibrium electrical ——— in liquid electrolytes (Review) (Macdonald) 1

Electrogravimetry,
cyclic voltammetry and quartz microbalance ——— of IgG and anti-IgG reactions on silver (Grabbe et al.) 67
Equilibrium electrical double layer,
comparison and discussion of some theories of the ——— in liquid electrolytes (Review) (Macdonald) 1

Fuel-cell electrodes,
preparation and characterization of carbon-based ——— with platinum-group bimetallic catalysts (Ramesh et al.) 91
Fulvic-like organic ligands,
adsorption of ——— and their Cd and Pb complexes at a mercury electrode (Buffle et al.) 235

Gallium arsenide,
experimental study of illumination effects on the cathodic current–voltage curve on n-GaAs (Herrnberger et al.) 215
Gauss–Newton method,
determination of the individual electrochemical parameters from a single composite dc wave by the ——— : dc wave composed of three waves (Boodts et al.) 79
Glassy carbon,
electrochemical dispersion of Pt microparticles on ——— electrodes (Shimazu et al.) 223
Gold,
dependence of the kinetics of proton reduction at ——— electrodes on the surface crystallographic orientation (Hamelin, Weaver) 171

Influence of electrochemical activation of an Au electrode on its electrocatalytic activity in relation to the oxidation of methanol in basic medium (Gonzalez Hernan et al.) 277
Illumination effects,
experimental study of ——— on the cathodic current–voltage curve on n-gallium arsenide (Herrnberger et al.) 215
Immittance,
on the reconstruction of large signal responses from ——— data (Sadkowski) 263
Immunoglobulin G,
cyclic voltammetry and quartz microbalance electrogravimetry of IgG and anti-IgG reactions on silver (Grabbe et al.) 67
Impedance spectroscopy,
——— and its use in analysing the steady-state ac response of solid and liquid electrolytes (Review) (Macdonald) 25
Isopolytungstates,
activation of electrode surfaces by ——— (Keita et al.) 287

Lead,
adsorption of fulvic-like organic ligands and their Cd and ——— complexes at a mercury electrode (Buffle et al.) 235

Manganese oxide,
rechargeable ——— electrodes. Part I. Chemically modified materials (Yung Fang Yao et al.) 107
Membranes,
Donnan Exclusion Failure in low anion site density ——— containing valinomycin (Buck et al.) 51
Methanol,
influence of electrochemical activation of an Au electrode on its electrocatalytic activity in relation to the oxidation of ——— in basic medium (Gonzalez Hernan et al.) 277

Platinum,
electrochemical dispersion of ——— microparticles on glassy carbon electrodes (Shimazu et al.) 223
Poly-3-methylthiophene,
incorporation of electrolyte cations into polypyrrole and ——— during electrochemical reduction (Zhou et al.) 283
Polypyrrole,
incorporation of electrolyte cations into ——— and poly-3-methylthiophene during electrochemical reduction (Zhou et al.) 283
Proton reduction,
dependence of the kinetics of ——— at gold electrodes on the surface crystallographic orientation (Hamelin, Weaver) 171
Pulse polarography,
reactant adsorption in ——— . Part V. Predominant adsorption of product (Lovrić) 271

Quartz microbalance electrogravimetry,
cyclic voltammetry and ——— of IgG and anti-IgG reactions on silver (Grabbe et al.) 67
Quinones,
redox reactions of ——— on carbon materials (Tarasevich et al.) 161

Reactant adsorption,
——— in pulse polarography. Part V. Predominant adsorption of product (Lovrić) 271
Rechargeable manganese oxide electrodes,
——— . Part I. Chemically modified materials (Yung Fang Yao et al.) 107
9-β-D-Ribofuranosyluric acid,
electrochemical oxidation of ——— in basic solution (Tyagi, Dryhurst) 119

Silver,
cyclic voltammetry and quartz microbalance electrogravimetry of IgG and anti-IgG reactions on ——— (Grabbe et al.) 67
Solid electrolytes,
impedance spectroscopy and its use in analysing the steady-state ac response of ——— and liquid electrolytes (Review) (Macdonald) 25
Sulfilimines,
heterogeneous and homogeneous redox catalysed reduction of some ——— (Griggio, Severin) 185

Valinomycin,
Donnan Exculsion Failure in low anion site density membranes containing ——— (Buck et al.) 51
